Let’s get started with the OneTouch Reveal® web app

Step-by-Step Guide

Your step-by-step guide to setting up and using the OneTouch Reveal® web app with the OneTouch Reveal® mobile app
The OneTouch Reveal® web app – supporting you and your patients throughout their journey

Designed to help you see what’s working and what’s not for your patients

- Helps track blood glucose, food, insulin delivery / dosing, and activity data to automatically detect patterns that can often go unnoticed
- Creates simple, colorful reports to help you have more meaningful conversations with your patients during appointments
- Seamlessly gathers data from all the devices that are linked to a patient’s account

Helping your patients to manage their diabetes between visits

- Shows patterns using colorful, easy-to-understand graphics to give patients in-depth information when they want it
- Personalized tips can help patients better understand their blood glucose readings*
- Reports can be printed to be ready for discussion at their next visit, helping you to make the most of your time with your patient

* Be sure to talk to your patients about the actions that are right for them.
Quick steps to setting up and using the OneTouch Reveal® web app

It’s easy to use – so let’s get you started.

1. **Sign in** (must have account activated)
   - Open OneTouchReveal.com using your browser
   - Enter your Username and Password
   - Verify that the current language is correct
   - Click Sign In

2. **Add new patients**
   - **Option 1** – Clinic creates patient account
     - Click the Patients tab, then click Add Patient
     - Fill in the Add a New Patient fields (* indicates mandatory field)
     - Click Save
     - Click Print Registration Summary to provide your patients with instructions on how to activate their accounts

2 Add new patients

Option 2 – Patient creates an account that links with clinic

- Instruct patient to install the OneTouch Reveal® mobile app and follow on-screen prompts to create an account
- The Clinic Code may be entered as a part of the registration
- Once installed, ensure patient pairs their OneTouch Verio Flex® meter with the mobile app

For support, patients can refer to the meter Owner’s Booklet or call 1 866 693-0599

Another way for your patient to connect and share their data...

- Using their OneTouch Reveal® mobile app, the patient can go to MORE, select Connections and tap Add a Clinic
- Provide patient with your specific 6 digit Clinic Account Office Code

Need help finding your Clinic Account Code?
Click on Manage Clinic tab. Then go under Profile > My Clinic > Clinic Code

Encourage your patients to activate their accounts so they can share their data for each consultation

3 View reports

- Click the Reports tab in the OneTouch Reveal® web app
- Enter any part of the patient’s name or ID in the Search for Patient bar, or sort by clicking on the top of any column
- Click on the patient’s name
- You can now choose and view patient reports

4 Download and print reports

- Click Download Reports from the report you are viewing
- Choose a report appropriate for your consultation
- A PDF of the report will download. Double-click on the PDF to open and then print

5 Remotely monitor patient progress between appointments

The Patient Population Management Tool is designed so that you can filter and sort your patient information in meaningful ways:

- Patients with Type 1 diabetes with the most lows (< 70 mg/dL)
- Patients with Type 2 diabetes with the most highs (> 180 mg/dL)
- Average blood glucose readings for Type 1 and Type 2 patient populations
- Further refine your list by sorting for number of blood glucose readings per day
- Age, gender, etc.
